Election/Restriction

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

2. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
3. **Group I, claim(s) 3-5 and 7-11** drawn to an adhesive resin composition for titanium or titanium alloy comprising a thermosetting resin and an imidazole compound.
4. **Group II, claim (s) 12-16** drawn to a prepeg comprising the adhesive composition for titanium or titanium alloy comprising a thermosetting resin and an imidazole compound and reinforcing fibers.
5. **Group III, claim (s) 21-26** drawn to a composite material wherein titanium or titanium alloy and an adhere are adhered to each other through an adhesive resin layer formed by curing the adhesive resin composition
6. **Group IV, claim(s) 31**, drawn to a method of making a composite material comprising an adhesive resin including a thermosetting resin to the surface of titanium or a titanium alloy.
7. Adhesive resin composition comprising a thermosetting resin is a common technical feature of Inventions I, II, III and IV. However, Sei et al. (US 5945188) discloses an adhesive tape, where the adhesive layer contains an epoxy resin, which is a thermosetting resin and an imidazole compound (col. 5, lines 36-40).

Art Unit: 4132

Thus, since the present claims fail to define a contribution over Sei et al., Adhesive resin composition is not a technical feature and claims **3-5, 7-16, 21-26 and 31** fail to form a single general inventive concept. Therefore, unity of invention is lacking and restriction is proper.

8. A telephone call was made to Andrew Miekle on 6/18//2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

9. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

10. The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

11. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship

Art Unit: 4132

must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

12. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

13. In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b).

Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the

Art Unit: 4132

restriction requirement is withdrawn by the examiner before the patent issues.

See MPEP § 804.01.
